### Recipe: Standard Recipe Kg

1.000Kg Soft & Chewy Cookie Mix

0.120Kg Water

### Method:

1. Place Soft & Chewy Cookie Mix and inclusions into a machine bowl fitted with a paddle.
2. Add water and mix on slow speed until a dough is formed.

### Deposit Weights & Baking Times:

Baking temperatures 170°C / 350°F (150°C/300°F)

- 50g Puck, bake for 14-16 minutes

**Notes** – Other flavours available

Please note:

When stored at temperatures below 10°C the mix can become compact and lumpy. For best results and for ease of handling, the mix should be tempered to between 10 and 20°C before use.
