10014070 Luxury Caramel Filling - TIS

Product Name: Luxury Caramel Filling

Ref Number: 10014070

Pack Size: 12.5kg Pail

Product Information: Luxury Caramel is a rich, smooth, chewy traditional caramel. It can be used for layering, filling and topping.

Can be warmed over a bain-marie directly in pail, or by decant into a heat proof bowl. Warm until the caramel loosens to suit spreading, flooding, piping or injection application uses. Stir frequently. Do not overheat. Microwave heating is not recommended. Caramel will set back again to its original texture after cooling. It can then be sliced with a warmed knife or ultrasound cutter.

Ideal for caramel shortbread, millionaire shortbread, caramel apple tarts, doughnuts and traybake lines.
